Problem Statement:

The current IT procurement process lacks efficiency and automation, resulting in delays and manual overhead, particularly in handling standard laptop orders. Requests for standard laptops often require configuration, but this step is prone to oversight or delay, leading to frustration among users and inefficient resource allocation within the IT department.

User story

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the hardware team for configuration. This will ensure that laptops are promptly configured upon arrival, reducing user wait times and minimizing manual intervention.

Project Objective:

The objective of this project is to implement an automated workflow using Flow Designer to facilitate the procurement and configuration of standard laptops. By integrating automation into the process, the project aims to:

1. Create a seamless experience for users requesting standard laptops by ensuring timely configuration.
2. Reduce manual intervention and potential errors in the procurement process.
3. Improve resource utilization within the IT department by optimizing task allocation.
Enhance overall efficiency and productivity in IT procurement operations.
4. Enhance overall efficiency and productivity in IT procurement operations.

TASK INITIATION

Milestone1:Flow

Activity 1:

Create a Flow to Create Catalog task to update the short description after Approval the service Request and it will be Assignment group to Hardware.

1. Open service now.
2. Click on All>> search for Flow Designer
3. Click on Flow Designer under Process Automation.
4. After opening Flow Designer Click on new and select Flow.
5. Under Flow properties Give Flow Name as “Standard laptop task”.
6. Application should be Global.
7. Select Run user as “System user” from that choice.
8. Click on Submit.

Lenovo - Carbon x1

x1 Carbon

The x1 Carbon is Lenovo's lightest ThinkPad yet. It provides a QHD display that fights glare and weighs less than three pounds. Ideal for most computing tasks, and highly mobile.

Technical Specs:

- Intel core i5 processor
- 512GB solid state drive (SSD)
- Backlit keyboard

Optional Software

☐ Adobe Acrobat
☐ Adobe Photoshop

4. Scroll down to the“ Catalog tasks” Section
5. Open the record to see the updated status of the record with Short description and Assigned group.

The screenshot displays a ServiceNow Catalog Task record for SCTASK0010001. The interface includes a top navigation bar with buttons for Discuss, Follow, Update, Close Task, and Delete. The record details are organized into two columns. The left column contains fields for Number (SCTASK0010001), Assigned to (with a search icon), Configuration item (with a search icon), Active (checked), Short description (Laptop needs to Configured), Description (Laptop needs to Configured), and Worknotes (Worknotes). The right column contains fields for Approval (Approved), Priority (4 - Low), State (Open), Request item (RITM0010001), and Requested for (System Administrator). A Post button is located at the bottom right of the form. The bottom of the screen shows an Activities section with a filter icon.

Description	Laptop needs to Configured		
Worknotes	Worknotes		

Conclusion

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.
